

Micro-Surfacing Road Works

Various Locations Town Wide

East Gwillimbury (EG) has hired Miller Paving Ltd. to complete micro-surfacing on various Town roads listed throughout the municipality. As part of the micro-surfacing works, various road patching and concrete repairs are required. Work is scheduled to start at the beginning of the week of Monday July 10, 2024, with anticipated completion for all locations by the end of September 2024. These works are weather permitting.

The Town's contractor will take all reasonable measures to ensure a non-intrusive construction process; however, if private infrastructure such as sprinklers, invisible fences, private wiring, etc. is installed on Town property, damages may occur and will be the responsibility of the property owner to repair.

The roads will remain open, with partial lane closures as required to complete these works. The work involves the application of liquid asphalt combined with fine crushed stone, applied to the existing asphalt surface, to extend the life of the road.

We apologize for any delays or inconvenience this work may cause. Driveways are not expected to be blocked, however if necessary, it will be for a limited time only.

To ensure an effective and efficient project, residents are asked not to park vehicles on the road during construction or where repair works are marked by white paint. Waste collection will not be disrupted. For more information, please visit our website at
